TO THE HONORABLE THE COLONIAL SECRETARY.

Legislative Council, Hobart Town, July 31, 1867.

SIR,

I HAVE the honor to present herewith the Statistics of the Colony for the year 1866.

Preliminary.

My appointment as Statistician was not publicly notified until the 22nd January last; and nearly one month of the present year had, therefore, passed before I was in a position to commence the work. This will account, in some measure, for any imperfections which may be found in regard to the form or matter of the Returns, inasmuch as it left me so much less time in which to compile them. On a more leisurely review of the Returns on a future occasion, further improvements may very possibly suggest themselves.

On assuming the duties of the new office, I found that the Statistics of former years had been prepared in so imperfect and inaccurate a manner, and with so little regard to order and method, that it was necessary to recast the whole; and accordingly the first duty was to reconsider every Return, both with reference to matter and shape, and to devise new forms where it appeared desirable. This of itself, considering the short time at my disposal, if the Returns were to be completed in time for presentation to Parliament, was a most anxious and laborious duty.

In addition to this, a large number of new Returns has been added, affording a corresponding amount of information, which I trust may be found useful and instructive. The obtaining of the information necessary for the preparation of these Returns, the examination, arranging, and compiling of them when received, and the inauguration of an entirely new system, have occupied the whole of the time not necessarily devoted to my other official duties, and have entailed an amount of physical and mental labour which would scarcely seem credible to those who have never been engaged in a similar work, and under similar circumstances; and in consideration of the fact that all this has been done by myself, without any assistance whatever (except in reading some of the proofs, in which Mr. H. M. Hull has been kind enough to lend his aid), and without any actual increase of emolument, I hope to receive at least credit for a considerable share of zeal and public spirit, and to reap such a measure of approval as the exhibition of those qualities may seem to merit.

Objects proposed.

My object throughout has been, primarily, to make the Returns practically useful to the Government, the Legislature, and the Public generally; and in subordination to that design, to serve the cause of Statistical and Social Science.

For the sake of convenience, I shall follow, in the remarks which I may have to make, the order which has been observed in the classification of the Returns themselves.

I.—POPULATION.

Population.

The first four Returns are simply reprinted without alteration, and require no comment.

The total population of the Colony on the 31st December, as estimated by adding the increase by Births and Arrivals, and subtracting the decrease by Deaths and Departures, was 97,368,—an increase of 2167, or 2·28 per cent.

Density.

The density of population is, for the whole Colony with its dependent islands, 3·71 to a square mile; or if the islands and lakes be excluded, 4 persons to a square mile. If, again, the unsettled parts (being 4,832,000 acres) be deducted, leaving 18,665·62 square miles, there will be 5·22 persons to a square mile. "The number of inhabitants to the square mile in Victoria at the date of the Census in 1861 was 6·2. There is now, in 1866, an additional unit, or rather more than 7 persons to the square mile. In New South Wales, in 1861, there was rather more than one person to each square mile; and in South Australia but four-tenths of a person to each square mile. In England and Wales, according to last Census, there were about 344 persons, on the average, to each square mile."*

Comparison for past ten years.

The following table shows the estimated or ascertained population for the ten years from 1857 to 1866:—

Years.	*Population.*	*Years.*	*Population.*
1857	83,612	1862.....	90,728
1858	84,420	1863.....	92,519
1859	86,451	1864.....	93,307
1860	88,053	1865.....	95,201
1861	90,211	1866.....	97,368

It will be seen that during the ten years the number added to the population was 13,756: that is, it had increased at the rate of 16·45 per cent. in the ten years. We cannot, of course, compare this rate with that of Victoria or New South Wales, since the conditions present in a gold-mining and an agricultural and pastoral country are so different as to make comparison useless; but it may be interesting to contrast it with the rate of increase which prevailed during a similar period in South Australia. By the Census of March 31, 1855, the number of persons in South Australia was 85,821; and on the 31st December, 1865, it was estimated at 156,605,—being an increase, in rather less than eleven years, of 70,784, or 82·48 per cent.; or about 7½ per cent. per annum, if distributed equally over that period.

Dividing the ten years given above into two quinquennial periods, we find that in the former the rate of increase was 7 89 per cent., while in the latter it was only 7·32 per cent. Of the rate of increase from Births, and of decrease from Deaths, I shall have occasion to speak under the head of "Vital Statistics."

Immigration and Emigration.

The Return given on the next page will show how the population was affected during the ten years by Immigration and Emigration. It will be seen that the number of persons who left the Colony in that period exceeded by 1557 those who arrived in it. Distinguishing between men, women, and children, we find that the number of men who arrived in the Colony exceeded by 388 those who departed from it; that as regards women, there was a loss to the population of 538; while the loss of children was 1407. This exodus of women and children seems to have been caused by wives proceeding to join their husbands, who had gone to settle in other countries, and principally in Victoria. The Registrar-General of Victoria, in his essay entitled "The Progress of Victoria," of which he has obligingly furnished me with a copy, remarks that in that Colony "the arrivals of females were in each year uniformly in excess of the departures of females;" and this circumstance tends to strengthen such a supposition. During the previous six years from 1851 to 1856, inclusive, no less than 10,420 persons were lost to the Colony by emigration, a large proportion being able-bodied men, many of whom have never returned; and in this we shall find one very important cause of the decline of our prosperity.

For the last three years the balance of Immigration and Emigration has been in favour of the Colony, and 690 souls were added to our population from this source last year. Most of these, however, will, no doubt, appear in the next year among the Departures, as being visitors from the other Colonies, who would return thither in the early part of the present year.

The number of Immigrants who arrived in the Colony under the "Bounty System" in 1866 was 53, as against 92 in 1865,—36 of whom were from Ireland, 14 from Scotland, and only 3 from England; 35 being Roman Catholics, and 18 Protestants.

* Mr. Archer's "Progress of Victoria," p. 14.

DECENNIAL Return of Persons who arrived in and departed from the Colony between the Years 1857 *and* 1866.

YEAR.	ARRIVED.				DEPARTED.				*Increase or Decrease by Immigration or Emigration.*

Decrease of Population by Emigration during the Ten Years.....									1557

* The number given under this head in the Statistics of 1860 is 379; it is corrected from the Population Return.

† There is a similar error in this case, which is corrected by the Return for the following year.

‡ Given in the Statistics of 1865 as 253.

II.—Trade, Commerce, and Navigation.*

The most important Returns under this head are those of the Customs Department. Customs Returns.

The total value of Imports for the year was £942,107, against £762,375 in the preceding year, being an increase of £179,732. The value of the Exports was £834,606, against £880,965 in 1865, being a decrease of £46,359 within the year 1866.

Adding the Imports and Exports together, we find that our commerce for last year was represented by the figures £1,776,713, and in the previous year by £1,643,340, showing an increase of £133,373. The Imports in 1866 exceeded the Exports by £107,501.

The commercial relations of Tasmania with other Countries in 1866 were as follows:—

	IMPORTS.	EXPORTS.	PROPORTION PER CENT. OF TOTAL	
			Imports.	*Exports.*
	£	£	£	£
United Kingdom - - -	253,180	344,131	26·87	41·23
Victoria - - -	537,878	320,626	57·09	38·42
New South Wales - - -	72,844	70,690	7·73	8·47
South Australia - -	—	17,347	—	2·08
Queensland - - -	3932	17,318	0·42	2·07
New Zealand - - -	1485	57,142	0·16	6·85
Mauritius - - -	67,278	6667	7·14	0·80
Guam - - -	—	685	—	0·08

The Imports in 1866 were at the rate of £9 13*s.* 6¼*d.* per head of the estimated population; the Exports at the rate of £8 11*s.* 5¼*d.* per head. In South Australia, in 1865, we find the rate per head of Imports stated to be £16 6*s.*, and the Exports £19 19*s.* 8¼*d.*

The following table shows the declared value of Imports and Exports, and the rate per head of population of each during the last ten years:— Decennial results.

* This heading was, by an inadvertence, omitted to be inserted in the Statistics, at page 6, before the words "Imports and Exports."

YEAR.	IMPORTS.	EXPORTS.	POPULATION.	RATE PER HEAD OF	
				Imports.	*Exports.*
	£	£		£ s. d.	£ s. d.
1857	1,271,087	1,354,655	83,612	15 4 0½	16 4 0½
1858	1,328,612	1,151,609	84,420	15 14 9¼	13 12 10
1859	1,163,907	1,193,898	86,451	13 9 3¼	13 16 2¼
1860	1,068,411	962,170	88,053	12 2 8	10 18 6½
1861	953,517	905,463	90,211	10 11 4¾	10 0 1
1862	857,423	919,649	90,728	9 9 0	10 2 8½
1863	902,940	999,511	91,519	9 17 3¾	10 18 5
1864	908,265	975,730	93,307	9 14 8¼	10 9 1¾
1865	762,375	880,965	95,201	8 0 2	9 5 8¾
1866	942,107	834,606	97,368	9 13 6¼	8 11 5¼

From this table, comparing the first and last years of the period, we find that the Imports have, during the ten years, decreased at the rate of 13·84, or nearly 14 per cent., and the Exports at the rate of 38·39 per cent. If we divide this period of ten years into two quinquenniads, we shall obtain the following result:—

	Average Imports per Annum.	*Average Exports per Annum.*
	£	£
First Quinquenniad, (1857-61)....	1,157,107	1,113,559
Second ditto, (1862-6).....	874,622	922,092
Decrease....	282,485	191,467

Thus it appears that the average Imports during the last five years were less than the average in the first five by 24·41 per cent.; but the average Exports were less in the last five than in the first five by only 17·19 per cent. There has been, therefore, a growing tendency in the Imports to diminish and the Exports to increase in relation one to the other; that is, we are producing more, in proportion to what we consume. Putting this in another light, we observe that from 1857 to 1861 there were only two years in which the balance of trade was in our favour; while from 1862 to 1866 there were four years in which the result was favourable in that respect. From all this we gather that although our trade has been dwindling down to a most alarming extent in regard to its magnitude, it stands on a perfectly sound basis, and only requires to be fostered and developed in order to restore the Colony to its former, and more than its former, prosperity.

Exports and Imports, 1857-66.

The following tables show the declared value of all the principal articles of export which were produced in the Colony during the ten years ending in 1866, and the value of the imports of articles which might have been produced in the Colony in that period. The amount of the imports is probably less than their real value, since there is always a temptation to the unscrupulous Trader to escape, if he can, the payment of duty, and, in order to attain that object, to depreciate, in so far as his transactions with the Custom House are concerned, the actual worth of his goods.

* There are errors in the Returns for both Ports for this year which are here corrected.

As regards the Exports, we find that that of Bark has largely increased. Bran has, on the other hand, largely decreased, the value in 1857 being £15,151, in 1866 only £3881. On Beef and Salt Provisions there is an increase. Butter and Cheese also show a large increase, amounting to about 726½ per cent. There is not one of the Australian Colonies that is at all comparable to Tasmania in regard to the conditions favourable to Dairy Farming; and there is, therefore, an unlimited market open to us for all produce of this kind. The refuse milk and curd might be used in feeding pigs, for which, I am informed, there is a large demand in Melbourne. There is a wide field in this direction for the exercise of enterprise, with little or no necessity for the outlay of capital; and the small farmer could not, probably, easily find any object to which he might more profitably turn his attention than this. The export of Breadstuffs shows, on the other hand, a very large diminution,—no less than 78 per cent. Oats and Barley also show a decrease, having declined to the extent of about 62½ per cent. The exports of Hay have also fallen to about one-quarter of what they were ten years ago. If this had been accompanied by a corresponding growth of root crops, it would have been a matter for congratulation, as indicating the commencement of a better system of farming; but a reference to the quantity of land under this description of crop proves that such was not the case, at least to any appreciable extent. As regards Horses, Whale Oil and Bone, Stone, Timber, Vegetables, and Carts and Carriages, there has also been a large decrease. Hides, Skins, and Leather, and Wool, show a small increase; Hops, Fruit (green and preserved), Jam, and Seeds, Plants, and Trees, on the contrary, a large increment. Sheep are among the latter class, but a considerable proportion has been sent to New Zealand, I believe, to stock stations there belonging to residents in this Colony; and therefore, as far as such proportion is concerned, they can hardly be considered Exports in the ordinary course of trade. The value of all the articles enumerated in this table in 1857 was £1,176,465, and in 1866 only £792,188, the difference amounting to 32·66 per cent.

The value of all the Imports in the above table is £1,835,802; and a comparison between the first and last years of the decade shows a falling-off of 63·43 per cent. The decrease affects all the articles, except Breadstuffs, Rope, and Twine (taking the first and last five years for comparison), Chicory, and Hides, Skins, and Leather. As regards the last item, we have seen that the Exports have increased, and the Imports also show an increase. This is to be accounted for by the fact that a large quantity of Kangaroo leather is sent out of the Colony to other markets where (particularly in England) it is in great request; and leather of foreign manufacture has, I presume, taken its place for home use. The Leather trade seems, therefore, to be in a healthy condition.

I have included Chicory in the table of Imports not because it holds, at present, any important place, considered in reference to the amount, but because I wished to direct attention to the question of its production. It is but a few years since it came into use in these Colonies; and as the demand will probably increase, it is worth while considering whether it might not be grown here for the supply of our own and the Australian markets. It is with the same view that I call attention to the imports of Rope and Twine.* Besides our own consumption, it will be seen that there is a demand for a large quantity in the other Colonies. Such a manufacture would encourage the growth of Hemp and Flax, and might find employment for a considerable number of our juvenile population.

* There were, in 1866, only two Rope Manufactories in the Colony.

Among the Imports of the Australian Colonies for the year 1865 I find the following :—

	VICTORIA.	NEW SOUTH WALES.	SOUTH AUSTRALIA.	TOTAL.
	£	£	£	£
Bran	29,021	6742	—	35,763
Beef and Pork	2935	3645	5575	12,155

	2,758,026	1,316,310	417,000	4,491,336

* Oats and Barley are not distinguished from other kinds of Grain.
† Including Coke and other Fuel.
‡ Chiefly from New South Wales.
§ Deals, when so distinguished, are excluded.

Confining our attention chiefly to Victoria and New South Wales, as being the nearest, and therefore the most conveniently situated for the purposes of Trade, we find that the former imported articles which might be supplied by this Colony to the extent of £2,758,026 in the year; the latter to the extent of £1,316,310. In regard to nearly all these articles, except Live Stock, it is quite as convenient for Victoria to procure them from this Island as from the ports of New South Wales, or, if from Launceston, much more so; and our facilities of Trade with her are, therefore, *cæteris paribus*, equal or superior to those of New South Wales. Bacon and Hams, Breadstuffs, Butter and Cheese, Malt, Malt Liquors, Oats and Barley, Timber and Vegetables, would of themselves, if we could successfully compete with our neighbours in their production, be a copious source of wealth to this Colony. Our Commerce is capable of great expansion, if only it be not impeded by mischievous and delusive restrictions on the part of our neighbours or ourselves. It must be acknowledged that the protective policy, which has been growing into favour with certain classes in some of the Colonies, is calculated greatly to retard the development of our resources; but it may be hoped that the arguments of abler Political Economists, and the warning example of the American States, will before long induce those who now cling to this fond but fatal delusion to adopt sounder commercial principles. Among nations, as among individuals, there can be no such thing as independence of others. Each must look to others for the supply of a portion of his wants; and he, in turn, is called upon to reciprocate the advantages which he receives: so that any interruption to the freest interchange of those things which are requisite for our necessities or convenience must be prejudicial as much to the one party as the other. It may be safely predicted that any country which resorts to Protection as a fancied means of fostering its native industries will, in the end, thus destroy the very thing which it designs to protect and cherish.

Impediments to Trade and Commerce.

It would seem to be greatly to the advantage of this whole group of Colonies if the inequalities in the Customs duties of each of them were so far removed as to permit a freer interchange of commodities among them. Just as in grafting a tree the object of the operator is to fit the stock and scion together so closely that the sap shall flow from one into the other unconscious of any division; so in regard to Commerce our design should be, I apprehend, so to equalise the conditions present in each of the Colonies that supply and demand may follow their natural laws and necessities, unchecked by any local causes or arbitrary restraints. An absolutely uniform tariff for the whole group is scarcely to be hoped for, and perhaps, considered in the light of local circumstances, is hardly to be desired; but it seems evident that the nearer we approach such a result the greater will be our common prosperity. The course of Trade may be compared to the blood circulating in the veins and arteries of an animal. Whatever, even in the finest and remotest capillaries, checks the free circulation of the vital fluid produces pain and disease, and until the impediment is removed health cannot be restored.

Intercolonial Free Trade Bill.

The Intercolonial Free Trade Bill, which was passed during the last Session of our Parliament, and is now awaiting Her Majesty's pleasure, enunciates, with Legislative authority, the principles which I have attempted to lay down; and will, doubtless, if the other Colonies (or, at least, the two nearest) can be induced to carry out its provisions, prove of immense advantage in promoting the growth of our Trade. It is much to be hoped that this measure may pave the way for the adoption of a more liberal and enlightened Commercial policy in the Colonies which may become parties to it, and of a more harmonious action in regard to matters affecting their common interests. The late Intercolonial Exhibition, and others which will, doubtless, be held hereafter, may also be expected to conduce to this result.

Shipping.

The Returns of Shipping show that during the past year 20 vessels entered inwards from the United Kingdom, 619 from other British Colonies, and 4 from the United States,—together 643 vessels, with a tonnage of 107,903. Compared with the Returns of 1865, there is an increase on the total of 3 vessels, and on the tonnage of 7627. When we examine the corresponding Returns for the last ten years, we find that there has been a gradual decrease year by year (taking the first and last years of the period) amounting to 378 vessels, representing 56,105 tons; that is, the number of Shipping inwards has decreased by 37 per cent. The decline in our Foreign Trade, as shown by this Return, is very remarkable. In 1857, 23 Foreign vessels entered our harbours; in 1865 and 1866, only 3. A comparison of the totals in the first and last five years of the period from 1857 (as shown in the subjoined statement) proves that the average number of vessels in the former was 895 per annum; in the latter, only 720. The Returns of Shipping outwards do not seem to require particular notice. (*See page* xii.)

The number of registered steamers belonging to ports in this Colony appear to show an increase of two iron steamers, with a tonnage of 197. The Return of registered Vessels generally for the past year has been put into a more convenient form than heretofore, and will be available for future comparison.

Whale Fisheries.

The Return of Vessels belonging to this Colony employed in the Whale Fisheries has been revived, having been discontinued for many years. It will be seen that this branch of Colonial industry employed 9 vessels, with a tonnage of 2257, and 229 men. The quantity of Oil taken was 380 tuns, valued at £38,000, or £100 per tun. I regret that the Statistical Returns do not afford the means of comparing the extent of our Whaling operations for any continuous period; but I find that in 1851 the number of Vessels employed was 21; in 1852, 18; and in the following year only 7: the value of the Oil and Bone in those three years being, respectively, £53,445, £42,990, and £26,743.

Coal.

I have added a Return of the quantity and value of Coal raised for sale during the year, which, I believe, will be found interesting. Appraising the Coal at its market value, it appears that this commodity added £13,036 to the wealth of the Colony. I see no reason why Coal may not become a considerable article of export. It will have been seen that Victoria and South Australia are dependent, to a large extent, on Foreign markets for their supply of this description of fuel; and it is a question for the consideration of those interested whether Tasmania might not advantageously compete with other countries in this direction.

Prices of Provisions.

On comparing the retail prices of Provisions for the two last years, it will be observed that Bread is returned as 1*d.* per pound cheaper in the latter, and Flour 13*s.* per cwt. cheaper, or 50 per cent. Butter, Potatoes, Sugar, Tobacco were also cheaper; while Brandy, Candles, Cheese, and Butcher's Meat were dearer.

III.—Finance.

General Revenue.

The Receipts of the General Revenue in 1866 (excluding the balance from 1865) were £245,421 10*s.* 2*d.*, of which £129,310 12*s.* were derived from Customs duties, and £47,053 2*s.* from sources classed as "Inland Revenue." The Expenditure was £242,361 7*s.* 6*d.*, classed under the following heads:—

	£	*s.*	*d.*
Expenditure under General Estimates	118,900	8	4
Ditto under Local Estimates	63,463	2	10
Special Disbursements	31,592	12	7
	213,956	3	9
Arrears of former years	28,405	3	9
	242,361	7	6

DECENNIAL Return of Shipping entered Inwards and Outwards from the Year 1857 *to* 1866.

1865 ...	637	99,214	6638	3	1062	77	640	100,276	6715	674	103,156	6913	3	1062	77	677	104,218	6990
1866....	643	107,903	7516	3	1009	91	643	107,903	7516	629	105,056	7420	3	1009	88	632	106,065	7508

The Receipts of the Land Fund (excluding the balance, as before) were £88,342 11*s.* 8*d.*, composed of the following sums:— Land Fund.

	£	*s.*	*d.*
Sales of Crown Lands	53,067	0	11
Rent of ditto	9,223	4	8
Fees	2,113	1	1
Debentures sold, &c.	23,939	5	0
	88,342	11	8

The Expenditure under the several heads was as follows:—

	£	*s.*	*d.*
Ordinary Services	42,139	7	4
Debentures redeemed	13,900	0	0
New Schools, and Immigration	1,108	1	9
Public Works,—Roads, Bridges, &c.	46,474	0	2
Arrears of 1865	3,119	9	7
	106,740	18	10

Comparing these results with those of the previous year, there appears to have been an increase of £9849 14*s.* 9*d.* on the Customs, and £3643 13*s.* 9*d.* on the Internal Revenue. On the total General Expenditure there is apparently an increase of £23,366 18*s.* 9*d.*, which seems (to a large extent, at least) to be accounted for by the difference in the mode of adjusting the accounts adopted in the two years. Comparative results.

As regards the Land Fund, there is a falling-off on the receipts from the sales of land of £6311 10*s.* 2*d.*; on those for the rent of land of £170 7*s.* 6*d.*; and on fees, &c., of £484 17*s.* 4*d.* The proceeds of Debentures, &c., in both years are so nearly equal as not to require any particular notice. The total Expenditure shows a decrease of £27,720 14*s.* 3*d.* upon that of 1865; but, on the other hand, there was brought to account in that year a repayment of £30,500 to the Imperial Government, so that in reality there would be an increase in 1866 of £2779 5*s.* 9*d.*

The Receipts under fixed heads of Revenue, for the nine years from 1858 to 1866, inclusive, are shown in the subjoined abstract. (*See page* xiv.)

As regards the General Revenue, there is a decrease on the nine years (omitting fractions) of £19,471, or 9·94 per cent. The decrease on the Customs amounts to £5297, or 3·93 per cent.; and on the Inland Revenue to £14,174, or 23·15 per cent. Excluding 1858, and dividing the remaining years into two quaternions, it appears that in the latter the Customs Revenue had increased to the extent of £26,892, or at an average rate, if spread equally over the four years, of £6723 per annum. The Inland Revenue, on the contrary, when treated in the same way, is found to have declined to the extent of £59,654, or at an average rate of £14,913 per annum.

Referring to the Land Fund, we find it fluctuates so much as to make any comparison between single years worthless. Confining it, therefore, to the first and last four years of the period from 1859, inclusive, the decrease on the total Revenue will be found to be £10,972, or at the average rate of £2743 per annum. The further investigation of this decrease, in reference to the separate items, will be more properly treated under the head of "Crown Lands, Agriculture, &c."

The General and Land Revenue, added together and treated as before, shows a decline on the last four years of £43,733, or £10,933 on an average per annum.

The Commissariat Expenditure during the year 1866 amounted to £56,460 9*s.* 10*d.* Commissariat.

The Banking Returns show, at the end of the year, a total of Assets amounting to £1,255,447 3*s.* 11*d.*, against a total of Liabilities of £714,685 17*s.* 8*d.*; the balance of Assets being £540,761 6*s.* 3*d.* The amount of Specie in the Banks was £165,412 10*s.* 6*d.*, being an excess of £89,406 9*s.* 1*d.* over the value of the Notes in circulation. Banking.

The statement which follows shows the combined operations of the Banks during the last ten years. The Assets have decreased at the rate of 37·84 per cent; the Liabilities at the rate of 47·68 per cent. The Notes in circulation have declined from £160,230 to £77,769, or 51·46 per cent.; and the amount deposited from £1,205,654 to £636,916, or 47·17 per cent.:—

Savings Banks.

The Return in reference to the Savings Banks is now presented for the first time, as is the case with the greater part of the Returns which follow. A comparison of the results for the last ten years does not show any striking variation, and I have, therefore, not deemed it necessary to encumber this Report with a Return for that period.

The Assets at the end of the second half-year (31st August) were £217,352 4*s.* 7*d.*, and the Liabilities the same. In the first half-year the amount withdrawn at Hobart Town (the information not being supplied for Launceston) exceeded the deposits by £3278 13*s.* 11*d.*; while in the latter the deposits exceeded the repayments by £2479 6*s.* 11*d.*

Post Office Money Orders.

Post Office Money Orders were issued in 1866 to the amount of £11,274 19*s.* 3*d.*, and paid to the amount of £8669 11*s.* 5*d.* The system was only in operation during the eight latter months of 1865, and in order to compare the progress of the system in the two years it will be necessary to calculate the amount for the whole of 1865, on the supposition that the same law prevailed throughout the year. This will give an increase in 1866 of 1255 in the number of Orders issued, and of £5294 17*s.* 8*d.* in the amount represented; being at the rate of 88½ per cent. upon the latter. A considerable part of this increase is attributable to the fact that during 1866 seven additional offices for the issue and payment of Money Orders were established in Country Districts. The amount of commission received and credited to the Revenue of this Colony was £235 15*s.* 2*d.*

Public Debt.

The amount of Debentures outstanding on the 31st December, 1866, was £553,230, which is at the rate of £5 13*s.* 7½*d.* per head of the estimated population on that day. The rate per head of public indebtedness in Victoria, in 1865, was £13 16*s.* 9½*d.* (excluding £60,000 due to the Bank, as not being a permanent debt); in New South Wales, £11 10*s.* 10¾*d.*; and in South Australia, £5 1*s.* 8¼*d.* In comparing the relative indebtedness of different countries, however, it is necessary that we should take into account the objects for which it was incurred, since it is evident that the amount of debt, as well in the case of nations as in that of individuals, may be taken as a measure either of adversity or prosperity, in proportion as it is incurred to make up current deficiencies of Revenue, or for the improvement of the estate, public or private, as the case may be.

Taxes, Duties, &c.

The Schedule of Taxes, Duties, and other sources of Public Revenue, which now appears among the Statistical Returns for the first time, will, I doubt not, be found very useful for purposes of reference. It is not as yet altogether complete, and probably there may be omissions of which I am at present unaware; but I trust in time to render it more perfect.

Public Works.

The statements of Public Works executed during the year will probably obviate the necessity for Parliamentary Returns in reference to that subject.

IV.—Establishments and Institutions maintained or assisted by Government.

Object of classification.

It seemed to me that practical convenience would be better consulted by placing all these Returns together under one head than by distributing them through the volume according to a more philosophic, but artificial, classification.

Post Office.

At the head of these Returns stands the Post Office. Since 1858 the number of Post Offices and receiving houses has increased from 95 to 121; the number of miles of post roads from 873 to 1073; the number of letters received from 347,889 to 433,446; the number sent from 314,812 to 380,211; the number of Town and District letters (not included in the foregoing) from 62,029 to 96,757. The number of newspapers received

has decreased from 401,770 to 326,392 (though in 1863 it fell to 305,314); the number despatched has also decreased from 874,998 to 775,277. The smallest number of newspapers despatched was in 1861, when it was only 596,844. The Post Office Revenue during the last ten years shows but little fluctuation, although in the last two years it has somewhat increased; while the Expenditure has sensibly decreased, the average for the first five years of the period being £16,052 per annum, and for the last £14,317. The charge against the Revenue on account of the Post Office is, therefore, every year becoming less.

Penal and Charitable Institutions.

The Returns relating to the several Penal and Charitable Establishments will, I venture to hope, be found of great use. The distribution of the liability of maintenance between the two Governments must, probably, be regarded rather as an approximation to the respective amounts than as an exact and final result, inasmuch as it has been arrived at (except in the case of Port Arthur) in anticipation of the settlement of the accounts between those Governments, and may therefore be somewhat modified when that settlement has been effected.

The expense of the Penal and Charitable Establishments (so far as they can be thus distinguished) to the Imperial and Colonial Governments, respectively, may be summarised as follows:—

	CHARGEABLE TO	
	Imperial Government.	*Colonial Government.*
PENAL.	£ s. d.	£ s. d.
Port Arthur	13,004 13 0	12,873 11 11
Gaol for Males, Hobart Town	216 1 9	4797 11 4
Gaol for Females, ditto	387 8 4	2755 7 6½
Gaol, Launceston	33 15 7½	3935 11 5½
	13,641 18 8½	24,362 2 3
CHARITABLE.		
General Hospital, Hobart Town	472 3 2½	6703 17 8¼
Ditto, Launceston*	745 17 4¾	2593 11 11¼
Lunatic Asylum, New Norfolk	1607 9 0	5695 18 10
Hospital, Campbell Town	—	272 10 0
Queen's Asylum	3298 12 0½	8255 7 10½
Brickfields Pauper Establishment	—	3985 10 2
Reformatory for Females	—	100 0 0
Benevolent Societies	—	1354 7 4
Ragged Schools	—	200 0 0
	6124 1 7¾	29,161 3 10
TOTAL	£19,766 0 4¼	£53,523 6 1

* The Surgeon-Superintendent was unable to state what portion of the expenditure was chargeable to the Imperial Government. But from the Report of the Board, which was received afterwards, it appears that 22 patients were, wholly or partially, so chargeable. The proportion has, therefore, been taken as 22 to 98½.

The cost of these Institutions is, therefore, rather more than one-sixth of the whole ordinary Expenditure from both the General and Land Revenues, and it is at the rate of eleven shillings per head for the whole population. It will be interesting to compare this expenditure (so far as it is possible to do so) with that for similar services in the Australian Colonies. What the cost of the Penal Establishments in South Australia is I have not been able to discover, but that of the Charitable Institutions for 1865 appears to have been £21,676 14*s.* 1*d.*, which is only about one thirty-sixth of the Consolidated Revenue,—while here the same item forms about one-twelfth, or three times as much. In New South Wales (which, like this, was a penal Colony) the expenditure for 1865 was,—for Penal Establishments, £53,098; for Charitable Institutions, £61,966;—or nearly one thirty-third and one twenty-eighth, respectively, of the Consolidated Revenue. In Victoria the expenditure for Penal Establishments for 1866 was estimated to be £82,926;* the cost of Charitable Institutions to the Government in 1865 was £66,378; or about one forty-second and one fifty-second part, respectively, of the Consolidated Expenditure for the latter year.†

There can be no question that the greater part (perhaps three-fourths) of the Expenditure under these heads in this Colony is due to the presence, in former times, of offenders transported hither by the Imperial Government. As there are still found some

* Deducting £2215 for Inspector and Clerks, in order to carry the same principle throughout the comparison.

† The Expenditure (£3,490,673) was obtained from the Registrar-General's data, "Progress of Victoria," p. 60.

who assert that the cessation of Transportation was prejudicial to the interests of the community, it may be well to remark that three-fourths of the sum before mentioned represents, at 6 per cent., a capital sum of £669,033: so that, in effect, for the temporary advantage derived from the employment of compulsory labour, and a considerable Imperial Expenditure, we are now permanently burdened with a debt the interest of which at the present time may be said to amount to £40,000, and is still increasing in proportion to the destitution of the poorer or more vicious classes.

Municipalities, Road Trusts, and Boards of Works.

Under the heads of "Municipalities," "Road Trusts," and "Boards of Works" (the last being entirely a new Return), a large amount of information not hitherto supplied has been given. The labour bestowed on the collection, revision, and compilation of these Returns has been very great, and I hope that the value of the result may be in proportion to it.

V.—Crown Lands, Agriculture, and Live Stock.

Crown Lands sold.

From the second of these Returns it will be seen that out of 397—the whole number of Country lots of Crown Land sold in 1866—158, or 39·8 per cent., were of and under 50 acres; 120, or 30·23 per cent., were of and under 100 acres; 82, or 20·65 per cent., were of and under 500 acres; and 37, or 9·32 per cent., were above 500 acres. The largest number of lots sold in any one country was in Devon,—being 94, as against 56, the next largest, in Dorset.

Decennial results.

The total extent of Crown Land sold during 1866 was:—Country lots, 61,368*a.* 0*r.* 3*p.*, as against 90,723*a.* 2*r.* 37*p.* in 1865; Town and Suburban lots, 922*a.* 0*r.* 1*p.*, as against 1390*a.* 1*r.* 8*p.* in 1865. The average price per acre obtained for Country Lands rose from 11*s.* in 1865 to 11*s.* 7½*d.* in 1866; while the average price of Town and Suburban Lands declined from £5 11*s.* 9½*d.* to £3 18*s.* 2*d.* per acre.

The abstract of the Land Returns for the last ten years is given below. The Country lots sold during the first five years of that period averaged 63,569 acres per annum, and in the latter five years 81,970 acres; being an increase of 18,401 acres per annum, or 28·95 per cent. The Town and Suburban lots sold averaged in the first five years 1814 acres per annum; in the latter five years only 911,—being a decrease of 49·78 per cent.

Rental from Crown Lands.

To the ordinary Returns relating to Crown Lands another has been added showing the number of acres rented, and the amount of rental, from the year 1842, inclusive. This will afford abundant matter for careful and earnest attention. It appears that 1847* was the first year in which we obtained any considerable Revenue from the leasing of the Lands. We then derived £14,279 from this source, the number of acres being 1,062,989, which gives an average rental of £1 6*s.* 10¼*d.* per 100 acres. The acreage and rental continued to increase until 1853, when the 2,314,414 acres thus occupied produced a revenue of £29,570, being at the rate of £1 5*s.* 6½*d.* per 100 acres. From this point the quantity of land rented has (excluding the islands, which must be viewed in a somewhat different light) continuously been decreasing, with the single exception of the year 1861, when it was slightly augmented; but the amount of rental has, without one exception,

* This appears to have been the result of the Regulations made in that year (*vide Gazette*, June 15, 1847), by which the minimum rental was fixed at £1 per 100 acres.

been declining from year to year until the present time. In 1866 we find the acreage had dwindled down to 1,369,771, and the rental to £8,564, which is at the rate of only twelve shillings and sixpence per 100 acres. This result is, of course, partly attributable to the fact that a considerable proportion of the best lands has been sold, and the remainder available for rental is not so valuable as in former years; but making all due allowance for this cause, the declension of this portion of the Land Revenue from £29,570 to £8564 in a period of 13 years induces the belief that the Land Systems of 1847 and 1851 were better than those by which they have been superseded. If the Crown lands can be made to yield a considerable permanent revenue, it is evident that relief might be afforded to that extent from taxation; and thus more capital would be available for the development of our resources. But in order to bring about such a result it would be necessary to make the tenure of land rented from the Crown more secure, and thus to encourage the Lessees to make improvements. Such improvements would enhance the value of the Public Estate, and it might be worth consideration whether drainage, irrigation, and other similar works, as regards unalienated Lands (as, for instance, in the Lake country), might not be executed by the Government, the interest of the amount expended being charged to the Lessees (supposing them to agree to the arrangement) in proportion to the quantity of land occupied by them.

Agriculture: decennial results.

Subjoined is a synopsis of the Returns, for the last ten years, of the number of acres of land under cultivation and in crop, and the number of acres of new land broken up during each year:—

YEAR.	*Number of Acres in Crop.*	*Number of Acres in Cultivation not included in the foregoing.*	*Total Number of Acres in a state of Cultivation.*	*Number of Acres of New Land broken up during the Year.*
1857	134,277*	71,843*	206,120*	—
1858	147,455	82,034	229,489	—
1859	140,635	67,984	208,619	7293
1860	152,860	65,455	218,315	7775
1861	163,385	84,499	247,884†	7894
1862	157,541	95,509	253,050	6787
1863	170,601	96,572	267,173	7793
1864	158,544	92,292	250,836	5807
1865	159,547	90,839	250,386	8183
1866	167,866	111,156	279,022	7908

* These numbers are taken from the Comparative Statement for the following year, which differ from those of 1857, and may be presumed to be more correct.

† There appears to be an error in the Returns for this year. The addition is here corrected.

In the last five years, as compared with the first five, the number of acres in crop appears to have increased at the rate of 10·22 per cent.; the number of acres in a state of cultivation, but not in crop, at the rate of 30·81 per cent.; and the total acreage under both the preceding classes at the rate of 17·11 per cent.

The number of acres under each description of crop is given on the next page,—a few items, such as Beans, Tares, &c., being omitted, as bearing but a small proportion to the other crops.

Ratios of Crops.

The ratio borne by each description of produce to the total acreage in crop is:—Wheat, 42·5 per cent.; Barley, 2·74; Oats, 13 5; Peas, 2·17; Potatoes, 6·26; English grasses (for seed), 3·21; Hay, 20·1; Root Crops, only 1·56; Tobacco, 0·128.

In Victoria (1865-6) the ratios were:—Wheat, 34 per cent.; Oats, 19; Barley, 1·3; Potatoes, 6; Hay, 18; Green forage, 10½.

In Great Britain, in the same period, the ratios were:—Corn Crops (including Rye, Beans, and Peas), 32·4; Green Crops (including Potatoes, Turnips, Mangolds, Carrots, Cabbage, Kohl-rabi, Rape, Vetches, Lucerne, &c.), 12·4; Clover and artificial and other Grasses under rotation, 12·9; Permanent Pasture, Meadow, or Grass not broken up in rotation (exclusive of hill pastures), 38·9. Adopting, as nearly as circumstances will admit, the same classification here, we shall obtain from the Returns for 1866 the following ratios:—Corn Crops, 68·5; Green Crops, 8·1; Grass and Hay, 23·4. It will be seen that the quantity of land under Corn here is more than double that in Britain, while the land in Green Crops is very much less. Such a state of things shows an urgent need of agricultural reform.

Nature of Crops for decennial period.

Years.	*Wheat.*	*Barley.*	*Oats.*	*Peas.*	*Potatoes.*	*English Grasses*	*Hay.*	*Root Crops, not including Onions.*	*Tobacco.*
1857....	63,357	11,735	31,940	854	7804	11,960	—	5443	—
1858....	50,463	10,850	47,729	1050	8147	8913	41,104	2697	97
1859....	60,314	7566	36,209	1029	7777	4505	29,395	2693	86
1860....	66,450	6238	30,303	1047	7621	6125	31,837	2760	78
1861....	58,823	7279	29,022	1649	9349	5184	31,803	2595	89
1862....	60,826	9470	31,153	1912	9722	5447	35,257	2758	152
1863....	54,028	9940	40,226	2153	9871	7223	41,438	4402	232
1864....	60,186	6320	40,987	2891	8438	4162	30,992	3032	127
1865....	73,270	4527	28,538	3146	10,270	5228	30,244	3141	156
1866....	71,348	4596	34,358	3655	10,520	5393	33,762	2621	216

The growth of Wheat is thus shown to have largely increased: Oats, Peas, Potatoes, and Tobacco have also increased. The growth of Barley has, on the other hand, decreased to a deplorable extent, considering what a wide field there is for its employment in producing Malt and Malt Liquors, both for home consumption and export. I have already referred to this point when speaking of the imports of these articles. English Grasses also show a decrease, but this may be partially owing to a change of system in compiling the Returns,—those for and after 1859 showing only the acreage of grass reserved "for seed," whereas in the two first years it does not appear that any such distinction was made. The growth of Hay does not seem to follow any general law. The acreage under Root Crops (Mangolds, Turnips, and Carrots) shows a slight improvement on the whole: the proportion which this crop bears to the Corn Crop is almost infinitesimal,—and this one fact is, of itself, a sufficient condemnation of the style of agriculture pursued here.

Change of system necessary.

Before Agriculture can ever flourish in this Colony a total change of the present system is necessary. That system may have answered well enough in the times when the soil was new, and the labour of convicts could be had for little more than the cost of their rations. A very moderate return then paid the farmer handsomely. But now, when labourers' wages are high, and farm hands difficult to get, an entirely new style of cultivation is necessary in order to make farming profitable. Instead of scratching up the surface of the ground to a depth of three or four inches, and year after year growing the same crop, without manure, and without fallowing, the soil must be manured and better prepared, a proper rotation of crops observed, and every means taken advantage of which science and observation afford, with a view to increase the fertility of the soil and diminish the cost of production. In fact, the whole principle of successful cultivation is contained in this problem,—*to obtain a maximum produce at a minimum cost.*

Means of effecting it.

The question, then, resolves itself into these two heads:—1. What are the means to be used in order to obtain the largest possible crop from a given quantity of land? and 2. How may the cost of production be brought within the narrowest possible limits?

1. By increasing the produce.

(*a*) Choice of Crop.

(*b*) Economy and choice of manures.

I. To obtain the maximum amount of produce from a given extent of land, we must not only increase to its utmost the fertility of the soil, but take care to cultivate only such crops as are most profitable,* and to select only the most prolific varieties of seed. The most obvious means of fertilisation are, 1. Manures. Of these the ordinary stable dung is one of the most valuable and easy to be procured, the neglect of which is the great defect in our Colonial farming. The object should be by every possible means to increase the supply of this manure. With this view, a considerable quantity of land should every year be put into root crops, which should be consumed on the farm, and so returned to the land. An agricultural writer says:—"The supply of manure, and consequently the continued fertility of the soil, depend, to a very large extent, both on the skilful culture of roots and on their economical consumption. The first thing calculated to secure the success of root culture is deep and effective working of the soil. This ought to be attended to in the Autumn months, and in all cases a depth of 10 or 12 inches should be aimed at, though at first it is almost impossible to give a furrow so deep as this." Again: "On strong soils home-made manures exercise a mechanical action which is of very great importance; but if we wish a heavy and profitable crop, we must have recourse to those portable manures which are now so extensively used in the best farmed districts, and with these supplement our yard dung as far as may appear to be necessary."† Farm yard dressing, guano,‡ lime, and bone dust are the manures used here at present, and, if judiciously employed, will probably suffice; but phosphatic guano and bone dust, when

* Among these Tobacco seems to be well worth serious attention. There are manufactories in both Melbourne and Sydney ready to purchase the raw material at a remunerative price, which was some time since said to be one shilling a pound. The produce in New South Wales in 1862 averaged 34 1-5th cwts. to the acre.

† Morton's "Resources of Estates," pp. 599—601.

‡ It does not seem to be generally understood that Peruvian or ammoniacal guano is suitable for green crops, phosphatic guano and bone dust for grain and root crops. The one cannot be interchanged with the other, though both may be used together with advantage.

applied in their natural state, often disappoint the farmer's expectations, because a large portion of the phosphates which they contain is insoluble, or only parted with by very slow degrees. The defect, however, to a great extent, can be removed by mixing them with Sulphuric Acid, and so converting them into Super-phosphate of Lime. It is the intention of a firm at Launceston, as I have understood, to undertake this branch of manufacture; and in the last Session of Parliament Sulphuric Acid was, with the object of facilitating the enterprise, exempted from duty on importation. There is no reason why such a manufacture might not also be established in Hobart Town; and if the Sulphuric Acid were also manufactured in the Colony (which might be done at a very small cost, the process being extremely simple), it would add to our resources another industry, and render the manufacture referred to more profitable. Not only might Mangolds be thus generally grown and sent to market in the form of meat, but Beet might also be cultivated for the purpose of making sugar. Nitrate of potash, or soda (saltpetre), is a manure which might also be well employed, especially where it could be applied in a liquid state, —that is, in situations where water is abundant. 2. Deep cultivation, fallows, and irrigation. As to the advantages of deep cultivation, there can be no question. Every one knows that no good garden can be made without trenching, and it is obvious that the more nearly we can attain this standard in farm cultivation, the more successful will be the result. The object in both cases is to stir up the subsoil and expose it to the influences of light and air, and to permit the roots of the plants to penetrate deeply into the soil in search of their necessary nutriment; but much judgment is, no doubt, necessary in applying the principle. Deep cultivation can be generally effected with horse power, but not nearly so beneficially as with the steam plough.

(*c*) Deep cultivation, irrigation, and fallowing.

Where a sufficiency of manures cannot be readily obtained, fallowing is the best substitute, and ought to be constantly employed in such cases, as without it the soil soon becomes worn out and almost useless.

The advantages of irrigation have been so often dwelt upon in this Colony on other occasions that there is no necessity to repeat them here.

(*d*) Improved modes of cultivation.

The mode of cultivation also greatly influences the amount of produce grown. Wheat, for example, when sown in drills, and kept clear of weeds by hoeing, will yield a very much larger crop and finer grain than when treated in the ordinary way; and by adopting such a system employment might be given to many children who are now brought up in idleness and vice.

2. By diminishing the cost.

II. The question remains, "How is a given extent of land to be cultivated at the least possible cost?"

Of course, if by improved methods of cultivation, by growing only the most profitable crops, and by selecting the most prolific varieties, we make one acre produce as much as two, we diminish the cost of production in proportion. But it is chiefly by adopting every possible expedient available for the purpose of saving manual labour, and performing the largest amount of work in a given time, that the cost of production is to be diminished. South Australia would never have occupied the position she does as a grain-growing country, had she not so extensively availed herself of mechanical appliances.*

(*a*) Use of mechanical appliances.

(*b*) Steam.

Steam cultivation is now being introduced into Victoria, and must soon, so far at least as the wealthier agriculturists are concerned, supersede slower and less efficient means; and unless the large landed proprietors and tenants here follow their example, they must be left far behind in the race of progress. Steam, in this age, has become a necessity; and in these Colonies, where the rate of wages is so high, and labour not always obtainable†, there is no way of compensating for these disadvantages except by employing machinery, the best and cheapest motive power for which is steam. It is found in England that steam cultivation can be profitably carried on even where the extent of land does not exceed 200 acres.

Advantage of steam over horse power.

As to the relative advantages of steam and horse power, the following extracts from the writings of a practical English agriculturist, Mr. Alderman Mechi, will be sufficient for my present purpose:—"Horse power is at least from 50 to 100 per cent. dearer than steam, where the latter can be brought to bear. If manufacturers were asked even to make the comparison, they would ridicule the idea, and tell you that but for steam you could be neither clothed, housed, nor fed. What a manufacturer wants and uses is 'power'—cheap, untiring power; and is this not exactly what the agricultural cultivator requires?" "Take an Atlantic steamer that steams unceasingly night and day, and sup-

* The number of acres of Wheat in South Australia in 1865-6 reaped by machine was 356,912, while the number reaped by hand was only 52,949.

† It will be remembered that last harvest, in several districts in the Australian Colonies, it was stated in the public journals that a portion of the crops had to be left to rot on the ground in consequence of the impossibility of getting hands to gather it in.

pose her power to be one thousand steam horses: you would require six thousand real horses to do the work!! To imagine what space so many animals would require, their food, water, attendants, bedding, harness, and shoeing, seems an impossible absurdity; and yet, practically, when a farmer uses a horse where he might use steam he is in an equally ludicrous and unprofitable embarrassment." Again: "There were now two great questions before the agricultural world. First, the introduction of steam to cultivation. He hoped that for all general purposes, as thrashing, grinding, and so forth, most farmers used the steam engine. And his hearers might depend upon it that they would never develop the full powers of Agriculture until they brought steam to bear on cultivation. Their five inches of cultivation would be exchanged for two feet or three feet: he said that very guardedly."* Speaking of steam cultivation in the Colonies, a correspondent of *The Australasian* of March 30th says:—"The cost of the machinery is borne in Britain by the farmers joining together in the various districts, by companies which supply machines, or by the large owners of land starting them for the benefit of their tenantry. The first is, however, the more usual method of introducing the steam plough. In a Scotch journal now before me I find a meeting of a Farmers' Association for Steam Ploughing reported. * * It would appear that their capital is £1000. * * In this Colony the farmers might subscribe the money for the machinery, in various districts; but as they are often very poor, I think if the Government were to advance them a certain part of the price of the machinery, to be paid back in a certain number of years, it would be an advantage to the country generally." Perhaps, if the question were entertained by the Government at all, it might be worth consideration whether prizes might not rather be offered for the successful establishment of steam cultivation, instead of the plan above suggested.

The late trial, imperfect as it was, of the steam plough and cultivator in Melbourne appears to have established the fact that, even with the present amount of experience in the working of the apparatus, about 7 acres can be ploughed and 9 cultivated per diem, at a cost of 8*s.* and 6*s.* per acre, respectively.†

In Europe it is found that steam cultivation involves the necessity of underground drainage, but it remains to be shown by actual experience whether, under the different climatic conditions of these Colonies, the same necessity exists here. Even if this should be the case, however, steam power offers an easy and economical means of performing the work. Probably, where the soil is light and tolerably dry, artificial drainage would not be required; but in heavy, tenacious clays it may be assumed to be little less necessary here than in Europe. There drainage, irrigation, and other similar works are often executed by the agency of Agricultural Improvement Companies, and more effectually than by individuals; and the same course might be followed in these Colonies.

If a number of the landholders within a convenient distance would agree to guarantee, for a limited term, a sufficient amount of work, there is every reason to believe that English manufacturing firms would readily undertake to provide and send out the necessary appliances and skilled persons to work them, although it is possible that a further guarantee of a certain rate of interest upon the capital so employed might be required. This, however, ought not to occasion any difficulty, considering the immense superiority of steam cultivation to the common mode.

Other means of improving Agriculture.

But there are other subsidiary means of promoting the advancement of Agriculture that might be brought into operation with advantage.

(*a*) By improving condition of farm servants.

Some improvement might be effected in the quality of the labour, by ameliorating the moral and intellectual condition of farm servants. This must be done chiefly by the employers of labour. By providing decent and comfortable dwellings for their dependents, by encouraging habits of sobriety and thrift among them, and furnishing them with the means of instruction and innocent recreation, the masters would probably find their own interests advanced. By these means the Country labourers would become more attached to the soil, make better workmen, and would be taught to respect themselves. The establishment of Working Men's Clubs in Country districts, where practicable, would be a great assistance towards this end. It would, perhaps, be well for the landed proprietors to offer prizes to be competed for by their *employés*, for neatness and cleanliness in their homes.

(*b*) Prizes by Agricultural Societies.

Besides the prizes now given by Agricultural Societies or Associations, others might, I think, with advantage be offered for (1) the largest quantity of manure produced in one year; (2) for the greatest extent of ground under root crops; and (3) for irrigation, and perhaps drainage.

---

* "How to Farm Profitably," pp. 228, 290, 167.

† *The Australasian*, May 25.

(c) Farmers' Societies.

An ingenious and successful agriculturist complained to me some time since of the disadvantage under which farmers here are labouring for the want of some means of communicating to each other the result of their experience and observation. Associations or societies might well be formed for this object, at which papers might be read and addresses delivered, and the common stock of knowledge be thus greatly increased.

General conclusion.

The conclusion of the whole matter is this,—that under present circumstances, Agriculture, to be successful, must be pursued with all the resources of skill and science,* as well as capital (at least to a moderate extent); and that unless these be brought to bear upon it, it is in vain to hope that this Colony can ever compete with other countries where a better system is adopted. As new conditions come into existence, new means must be employed to meet them.

Returns of Produce.

I have abstained from making any comparison between the crops produced in the different years, as the Returns up to this time have been mere estimates, taken before the produce was gathered in, and are therefore utterly unsafe for statistical purposes. The yield for the last year (1866) will, I am informed, be found to be very much greater than the estimate; and no doubt the same (or the reverse) has often been the case in former years.

Live Stock.

The following comparative table shows the number of Live Stock, as stated in the Official Returns, for the last ten years:—

Years.	*Horses.*	*Horned Cattle.*	*Sheep.*	*Goats.*	*Mules.*	*Asses.*	*Pigs.*
1857	19,857	80,144	1,635,920*	2633	—	—	34,237
1858	21,563	79,460	1,504,393	2330	7	9	30,673
1859	20,559	79,950	1,697,199	2819	3	9	32,008
1860	21,034	83,366	1,700,930	2888	6	9	31,290
1861	22,128	87,114	1,714,498	3330	—	7	39,677
1862	20,742	83,143	1,661,225	2356	6	4	38,491
1863	21,964	90,446	1,800,811	2276	7	5	41,986
1864	22,090	89,801	1,736,540	2393	7	6	50,380
1865	22,152	90,020	1,752,719	2410	8	4	36,624
1866	21,567	88,370	1,722,804	2486	11	5	33,259

* There is an error in the Statistics of this year in regard to the number of Sheep in the George Town District. I have adopted the correction made by Mr. Calder in Legislative Council Paper No. 28, 1864, pp. 8 and 15.

The number of Horses, it appears, was in 1866 nearly the same as it was in 1857, and only four more than in 1858. The average annual number of Horned Cattle in the first five years was 82,007, and in the latter 88,356; being an increase of 6349 per annum, or 7·74 per cent. The same process shows that the Sheep have, during the last five years, increased on an average at the rate of 83,232 per annum, or 5·04 per cent. on the average number in the preceding quinquenniad. The number of Goats seems to have decreased. Pigs have increased (pursuing the same method of comparison) at the rate of 6571 per annum, or at the rate of 19·57 per cent.; the average number in the two periods being 33,577 and 40,148, respectively.

These results, which are, I believe, contrary to the common impression that our Live Stock has been decreasing, will show how fallacious it is to compare the numbers in any two single years together. In order to deduce the general law of increase or decrease, it is necessary to extend the comparison over a series of years. As regards Sheep, the increase has doubtless been kept down by the ravages of fluke, especially in the Lake country and in many other wet, undrained localities: and as regards Cattle, one reason why they have not more rapidly multiplied may probably be gathered from the large increase in the exports of Butter and Cheese, it being a frequent practice with dairy farmers to kill the calves as soon as they are born, in order to save the milk which would be required for rearing them.

VI.—Law, Crime, &c.

Trials before Supreme Court.

The number of persons tried before the Supreme Court in 1866 was 165 (being 10 less than in the preceding year), of whom 127 were convicted, and 38 acquitted. The number tried before the Recorder's Court, Launceston, was 35 (being six more than in the preceding year), of whom 28 were convicted, and 7 acquitted.

* This was accepted as a truth in very early times,—

Pater ipse colendi
Haud facilem esse viam voluit; primusque per artem
Movit agros, curis acuens mortalia corda,
Nec torpore gravi passus sua regna veterno.

Virgil, Georg. I, 121-4.

The criminal business of the superior Courts of the Colony for the last ten years is exhibited below.

YEARS.	SUPREME COURT.			COURTS OF QUARTER SESSIONS.			RECORDER'S COURT, LAUNCESTON.			TOTAL CONVICTIONS.
	Felonies.	*Misdemeanors.*	TOTALS.	*Offences against the Person.*	*Offences against Property.*	TOTALS.	*Offences against the Person.*	*Offences against Property.*	TOTALS.	
1857..	61	21	82	22	58	80	..	..	..	162
1858..	113	37	150*	6	22	28	..	..	..	178
1859..	121	29	150	..	..	..	12	22	34	184
1860..	97	43	140	..	..	..	9	19	28	168

1865.	113	20	133	..	..	..	3	18	21	154
1866..	109	18	127	..	..	..	..	..	28‡	155

* In this year the jurisdiction of the Court of Quarter Sessions was transferred to the Supreme Court.

† This appears in the Statistics for the year as 8 only; it is corrected from the addition.

‡ The total only can be given, a different classification having been adopted for this year.

The total number of persons convicted has diminished considerably. For the purpose of more ready comparison, it will be convenient to give the proportions in a tabular form:—

Years.	*Proportion to Total Population.*	*Proportion per 1000 of Population.*	*Years.*	*Proportion to Total Population.*	*Proportion per 1000 of Population.*
1857.....	1 in 516	1·937	1862.....	1 in 639	1·565
1858.....	1 in 474	2·108	1863	1 in 750	1·333
1859.....	1 in 470	2·128	1864.....	1 in 657	1·522
1860.....	1 in 524	1·908	1865.....	1 in 618	1·617
1861.....	1 in 710	1·408	1866.....	1 in 682	1·592

In 1857 one in every 516 persons was convicted before the superior Courts, and in 1859 one in 470; while in 1863 only one in 750, and in 1866 one in 682, was so convicted. This result shows that serious offences, at least, are decreasing. Of minor offences dealt with by the magistrates, there are no records in the Statistics of former years, and I am afraid it will still be difficult, if not impossible, to obtain complete and accurate Returns.

The number of persons committed for trial in 1866 was 238, being one in 409, or 2·444 per 1000 of the total population. In South Australia in 1865 I find that the ratio of commitments to population was one in 567, and in the previous year one in 767 (the mean of seven years being one in 595); or, in 1866, 1·705 per 1000, in 1865, 1 308,—the mean being 1·729. The comparison, therefore (considering that South Australia has never been a penal settlement), is not unfavourable to this Colony.

Executions.

During the last year there was not a single criminal executed. This is the first time, probably, in the history of this Colony that such has been the case, and the fact is, therefore, worthy of special mention. I may also observe that for the last thirteen years, at least, the whole of the criminals executed were either convicts or persons who had been convicts; not one "free" person being among the number.

The executions for the last ten years were as under:—

Years.	*Persons executed.*	*Years.*	*Persons executed.*
1857.....	9	1862.....	3
1858.....	5	1863.....	2
1859.....	12	1864.....	1
1860.....	6	1865..	2
1861.....	4	1866.....	—

Litigation.

The civil business of the Courts for the past decade is exhibited in the following synopsis. It will be seen to have very considerably diminished.

YEAR.	CIVIL CASES TRIED IN THE SUPREME COURT.	COURTS OF REQUESTS.			
		Summonses Issued.	*Actions Tried.*	*Fieri Facias.*	*Capias ad Satisfaciendum.*
1857	52	1277	963	381	83
1858	34	1652	1182	519	152
1859	42	1304	902	549	10
1860	28	1854	1031	567	19
1861	28	818	484	254	5
1862	25	1277	703	380	9
1863	23	443*	205*	129*	4
1864	24	924	—†	329	7
1865	23	1228	395	363	3
1866	26	997	451	321	6

* These numbers are so much below the others, that some error may be suspected.
† Not given for this year.

Insolvencies.

The following is an abstract of the Returns relating to Insolvencies during the same period. It will be seen that during the last five years the number has greatly decreased, proving what I have before inferred,—that if our Trade is more contracted now than formerly, it stands at least on a sounder basis.

YEAR.	PERSONS WHO HAVE BEEN DECLARED INSOLVENT BY THEIR CREDITORS.			PERSONS WHO HAVE DECLARED THEMSELVES INSOLVENT.		
	Number of Persons.	*Amount of Scheduled Assets.*	*Amount of Scheduled Liabilities.*	*Number of Persons.*	*Amount of Scheduled Assets.*	*Amount of Scheduled Liabilities.*
		£	£		£	£
1857 ...	2	16,325	14,705	148	39,637	83,256
1858....	8	50*	1500*	146	44,163	130,195
1859....	10	*Nil*	*Nil*	131	91,619	130,446
1860....	12	27,705	30,348	160	38,705	168,141
1861....	9	1812	1508	146	82,598	172,424
1862....	10	33,020	37,965	96	42,023	125,622
1863....	4	*Nil*	*Nil*	61	17,639	40,377
1864....	5	12,007	10,463	58	57,212	98,395
1865....	6	9668	17,969	81	33,039	73,530
1866....	5	468	1304	59	23,828	43,689

* No Schedules filed at Launceston.

It may be interesting to mention that in 1857 the average amount of each insolvent's liabilities was £6531; in 1866, only £380.

Transactions under Real Property Act.

As regards the transactions of the Lands' Titles Office, the only matter which seems to require special notice is the increase in the number of mortgages discharged during the year,—namely, eight (more than 50 per cent. over those in 1865), representing 4561 acres, valued at £7324. Considering that nearly the whole of this was in the "Country," as distinguished from the "Towns and Suburbs," I presume this fact may be taken as indicative of an improved monetary condition of the landed proprietors. The amount of the Assurance Fund at the end of the year 1866 was £1156.

Mortgages.

The whole number and amount of the mortgages on land registered for the ten years past are as follow:—

Years.	*Number.*	*Amount.*	*Years.*	*Number.*	*Amount.*
		£			£
1857.....	276	190,009	1862.....	343	157,596
1858.....	348	231,153	1863.....	234	218,214
1859	396	279,854*	1864.....	265	199,383
1860.....	380	236,418	1865.....	274	165,577
1861...	392	358,676	1866.....	316	156,008

* There is an error in the statistical return for this year, which has been corrected by reference to the Registrar of Deeds.

The amount for 1866 is equal to a liability of £1 12*s.* 0½*d.* per head for the whole population. In South Australia, in 1865, the rate per head of population was £4 9*s.* 7¼*d.*; in Victoria, in the same year, £2 2*s.* 7*d.*; and in New South Wales, £1 10*s.* 9¾*d.*

VII.—Education.

The Returns usually furnished by the Board of Education were not received in time to appear in their proper place, and will, therefore, be subjoined as an Appendix; but, with a view to preserve uniformity of system as regards the present and future Returns, I have retained the heading.

VIII.—Vital Statistics.

During the year 1866 the number of Births registered was 2805; the number of Deaths, 1327 (four of which occurred beyond the geographical limits of the island); and of Marriages, 571. Births, Deaths, and Marriages.

CORRIGENDUM.

In Report, page xxiv., after Table of Insolvencies, *for* "in 1857 the average amount of each Insolvent's liabilities was £6531; in 1866, only £380"—*read* "in 1857 the average amount, &c. was £653; in 1866, it was £703."

The average liabilities for each of the ten years was as follows:—

Years.	*Average for each Insolvent.*	*Years.*	*Average for each Insolvent.*
	£		£
1857.....	653	1862.....	1543
1858.....	855	1863.....	621
1859.....	925	1864.....	1728
1860.....	1154	1865.....	1052
1861.....	1130	1866.....	703

The inference drawn in the text is therefore not sustained.

YEAR.	*Prisoners of the Crown.*	*Executions.*	*Total.*	*Correction to be added to former Death Rate.*	*True Death Rate per* 1000.
1857....	30	9	39	·466	17·43
1858....	14	5	19	·225	18·73
1859....	12	12	24	·277	16·59
1860....	7	6	13	·147	20·01
1861....	8	4	12	·133	16·50
1862....	2	3	5	·055	15·07
1863....	3	2	5	·054	15·55

1865 ...	1	2	3	·031	13·30
1866....	9	—	9	·092	13·72
		Mean for the Ten Years.....		·151	16·23

The birth rate, it will be seen from the first table, has, in the ten years, declined from 38·82 to 28·81;* that is, in 1857 the Births were one in every 26 of the population; in Births.

* Throughout these and all other similar calculations the population is taken as it stood at the end of the year.

The amount for 1866 is equal to a liability of £1 12*s.* 0½*d.* per head for the whole population. In South Australia, in 1865, the rate per head of population was £4 9*s.* 7¼*d.*; in Victoria, in the same year, £2 2*s.* 7*d.*; and in New South Wales, £1 10*s.* 9¾*d.*

VII.—Education.

The Returns usually furnished by the Board of Education were not received in time to appear in their proper place, and will, therefore, be subjoined as an Appendix; but, with a view to preserve uniformity of system as regards the present and future Returns, I have retained the heading.

VIII.—Vital Statistics.

Births, Deaths, and Marriages.

During the year 1866 the number of Births registered was 2805; the number of Deaths, 1327 (four of which occurred beyond the geographical limits of the island); and of Marriages, 571.

The proportional numbers for the last ten years, according to the Statistical Returns, are given below:—

YEAR.	PROPORTION PER 1000 OF THE LIVING POPULATION.		
	Births.	*Deaths.*	*Marriages.*
1857	38.82	16·96	10·73
1858	37·17	18·50	9·23
1859	37·52	16·31	8·16
1860	36·77	19·86	7·82
1861	35·55	16·37	7·95
1862	34·70	15·01	7·01
1863	32·76	15·49	7·62
1864	32·48	15·36	7·48
1865	32·23	13·26	6·20
1866	28·81	13·63	5·86
Mean for the Ten Years	34·68	16·07	7·80

The Act of Council, 2 Vict. No. 8, sec. 22, provides that the deaths of Prisoners of the Crown who are still under sentence shall not be registered. This is a very inconvenient provision, and I would submit that it should be repealed, as being at variance with the practice in other countries, and opposed to the interests of Science.

In order to arrive at the true death rate, the above table must be corrected as follows:—

YEAR.	*Deaths of Prisoners of the Crown.*	*Executions.*	*Total.*	*Correction to be added to former Death Rate.*	*True Death Rate per* 1000.
1857	30	9	39	·466	17·43
1858	14	5	19	·225	18·73
1859	12	12	24	·277	16·59
1860	7	6	13	·147	20·01
1861	8	4	12	·133	16·50
1862	2	3	5	·055	15·07
1863	3	2	5	·054	15·55
1864	2	1	3	·032	15·39
1865	1	2	3	·031	13·30
1866	9	—	9	·092	13·72
Mean for the Ten Years				·151	16·23

Births.

The birth rate, it will be seen from the first table, has, in the ten years, declined from 38·82 to 28·81;* that is, in 1857 the Births were one in every 26 of the population; in

* Throughout these and all other similar calculations the population is taken as it stood at the end of the year.

1866 they were only one in 35. Even as compared with the previous year, there was a decrease at the rate of 3·42 per 1000; and as compared with the mean rate for the ten years, a decrease of 5·87. The Births in England in 1863 were at the rate of 35·39* per 1000. In Victoria, in 1865, they were at the rate of 42·04 per 1000; in New South Wales, 42·01; and in South Australia, 42·60. It must be confessed, therefore, that the rate of increase to the population from Births is less in this than in any of the other Colonies named. This will sufficiently account for the very small increase in the number of inhabitants, in comparison with that of other countries similarly circumstanced, which has been noticed under the head of "Population." The mean birth rate during the first five years of the above period was 37·17, and in the latter only 32·20, which is a decrease of 4·97, or 13·37 per cent. The excess in the birth over the death rate in the first quinquenniad was 19·32 per 1000, in the latter only 17·59. The Births, therefore, are diminishing more rapidly than the Deaths; so that unless this effect be interrupted by external causes, the natural increase to the population will gradually become less and less. The removal of an undue proportion of phosphates from the soil by exhaustive cropping has probably had some share in bringing about this result, since, according to physiologists, a deficiency of phosphoric acid in the soil is followed by a diminution of vigour in the human frame.

The proportion of male to female Children born in 1866 was 1432 to 1373, or as 104·12 to 100. In all England (1861) it was as 104·6 to 100.

Deaths.

Of the 1327 Deaths registered in 1866, 791 were males, and 536 females,—the former exceeding the latter by 47·5 per cent.; so that the excess of deaths of males was about ten times the excess of births.

The deaths of Children under one year of age were one in five of the whole number, or 19·89 per cent. In Victoria, in 1865, the proportion was nearly one in three, or 33·82 per cent.† In Queensland the proportion was one in three, or 33·47 per cent., in the same year. In England, in 1861,‡ the ratio was one in four, or 25·03 per cent.

The true death rate for all ages in Tasmania in 1866 was 13·72 per 1000 living, and for the ten years 16·23. The mean in Victoria, in 1856–65, was 17·84; and in England, in 1852–61, 22·21. The mean for the very healthiest county of England (Rutlandshire), for the ten years 1852–61, was 18·12. From 17·85, the mean of the first quinquenniad, the death rate had decreased to 14·61, the mean of the second quinquenniad, or 18·15 per cent. In the course of the remarks that I have made, it has frequently been my duty to draw comparisons unfavourable to this Colony; and it gives me, therefore, the greater satisfaction to be able to record the fact that as regards the healthiness of its climate (in spite of want of sewerage in the Towns) Tasmania is greatly superior to any of the other countries to which I have referred. In this respect she is, perhaps, unrivalled.

The Quarterly Returns of Deaths enables us to institute the following comparison as regards Tasmania (1858–66) and Victoria (ten years)§:—

QUARTERS.	PROPORTION PER 100 OF TOTAL NUMBER OF DEATHS.	
	Tasmania.	*Victoria.*
First, (January to March)	27·53	32·05
Second, (April to June)	24·58	25·31
Third, (July to September)	26·01	20·74
Fourth, (October to December)	21·81	21·90
	100·00	100·00

In Tasmania, as it thus appears, the healthiest quarter is the last, from October to December; the least healthy is the first, from January to March. In Victoria the least healthy is also the first; but the smallest proportion of deaths is there to be found in the third quarter, and not, as in our climate, in the fourth.

* "Progress of Victoria," p. 23.

† The deaths of Children under one year are not distinguished in the Statistics of New South Wales and South Australia.

‡ Registrar-General's Report of 1863, the latest to I which have access.

§ "Progress of Victoria," p. 24. These particulars, as regards the other Australian Colonies, are not readily obtainable.

Marriages.

The number of Marriages registered in 1866 was 571, being 20 less than in the previous year. Only two of these took place before Deputy-Registrars. On referring to the foregoing table for the last 10 years, it will be seen that the marriage rate has been gradually decreasing from 10·73 per 1000 of the population in 1857 to only 5·86 in 1866, or 54·62 per cent. The mean rate for the ten years was 7·8 per 1000. In Victoria the marriage ratio has also declined, during the ten years 1856–65, from 10·71 to 7·29, the mean being 8·79. In New South Wales the rate has also decreased, in 1857-64, from 10·0 to 9·02, the mean being 9·33.

Returns of Diseases and Deaths.

Among the Statistical Records appears this year, for the first time, a Return of Diseases and Deaths in the different Hospitals and the Queen's Asylum,* classified according to the system of Dr. Farr, which is now adopted by the Registrar-General of England, and by all the Australian Colonies. The compilation of this Return has cost me much thought and labour, but I have received valuable assistance in my attempt to introduce the system here from the Nosological Index prepared by the Registrar-General of Victoria, several copies of which he was kind enough to forward to me; and I have supplied one to each of the Institutions included in the Return. It is very desirable that the deaths for the whole Colony should be classified according to the same system, which might easily be done by supplying to each of the Deputy-Registrars a copy of the Index referred to, with proper directions as to the use of it. I should be happy to lend any assistance that might be required in promoting the adoption of this system, which is most valuable for purposes of comparison with the Vital Statistics of other countries. There is another and more important purpose to be served by such a classification and record of diseases. "One great object of Statistical Returns is to furnish such an identification of the diseases prevalent in any locality as may lead to a determination of the causes, and may give an immediate clue to the measures which are necessary for prevention. In all cases, especially in the Army and Navy, this is one great use of Statistical Returns."†

Death rate in Hospitals.

The whole number of cases treated in the Institutions referred to in this Return was 2214, and the number of deaths 205, or 9·26 per cent. of the cases treated. If we exclude the Queen's Asylum, the mortality in the Hospitals alone would be 12·53 per cent. In Victoria, in 1865, the Hospital death rate was 10·32 per cent. In the Adelaide Hospital it was 9·6 per cent., the mean of ten years (1856–65) being 8·75.

In the Hospital for the Insane the number of deaths was 13, the average number of patients for the year being 251, which gives a proportion of 5·18 per cent. In 57 Lunatic Asylums in England, in 1851, the rate of mortality was 11·07 per cent., calculated not upon the average but upon the number of patients in the different Asylums on the 8th April, the day of the Census.

Influence of density of Population.

It should be observed that, in comparing the death rate in different localities or institutions, it is necessary to make allowance for the different degrees of density of the population or inmates, since it has been found to be a well-established law that the mortality increases *pari passu* with the density. The mortality in the Hospitals here should, therefore, be less than in Melbourne: the anomaly must be left to be explained by those who are in a position to compare the arrangements in the respective Institutions.

Queen's Asylum.

It is a fact worthy of special record that during the past year—for the first time, I believe, in the history of the Institution—there was not a single death among the children in the Queen's Asylum. When it is considered that the daily average number throughout the year was 511, the circumstance cannot fail to be regarded as a very remarkable one.

IX.—Miscellaneous.

Under this head two Returns have been added which will probably be read with some interest:—1. Of the number of Electors for both Houses of Parliament, showing the changes in the Rolls during the year; and 2. Of the number of persons employed in gold mining at Fingal, and the quantity of gold obtained. The latter is not so perfect as could be wished, but it is hoped that in another year it may be rendered more complete.

---

* The Hospital for Insane has not been included, since all the patients are suffering from one primary disease (mania), and there is, therefore, no common ground of comparison, except with Institutions of a similar kind.

† Dr. Parkes, F.R.S., in Transactions of the Epidemiological Society of London, 1864-5; appendix, p. 27.

‡ "The mortality of the sick who are treated in the large general Hospitals of large Towns is twice as great as the mortality of the sick who are treated in small Hospitals in small Towns.

"It remains to be seen whether the mortality in small Hospitals is not twice as great as the mortality of the same diseases in patients who are treated in clean cottages.

"Should this turn out to be the case, the means of realising the advantages of the Hospital system, without its disadvantages, will then be sought and probably found, as the problem is not insoluble."—*Dr. Farr to the Registrar-General of England,* 1863.

Conclusion.

I have thought it necessary, in the foregoing observations, to take a careful and detailed review of the commercial, financial, and agricultural condition of this Colony in the last decennial period, in order to lay a sure foundation for future comparison. Several ways in which our resources seem capable of development have been pointed out, and some manufactures have been suggested. But as all, or nearly all, manufactures require a considerable preliminary outlay, and involve a certain amount of risk, it is not always suitable to the circumstances of a young and thinly peopled Colony to undertake them. It is, therefore, to Agriculture that we must chiefly look as a means of rescuing this Colony from the state of depression into which it has so long and so continuously been drifting. A system of Agriculture, to fulfil the conditions necessary to success in the present time, must involve (1) the employment of labour-saving appliances in every case in which their use is possible,—to which end some capital will be requisite; (2) the copious application of fertilisers, natural and artificial, and the proper adaptation, on the principles laid down by Liebig and others, of plant, soil, and manure to one another; (3) such a rotation of crops as may be found most suitable to the climate and circumstances; and (4) a proper system of fallowing, wherever it may be called for. Pursued in this manner, and with the advantages of this climate, which is very rarely, if ever, subject to the Summer droughts and the Winter floods of the neighbouring Colonies, Agriculture might make this a second Sicily—the granary of the Australian Group. A large increase of agricultural produce would necessitate and justify the construction of a system of railroads, which again, by a reflex action, would tend to promote such an increase, and excite generally a spirit of activity and enterprise. The stocking of our rivers with Salmon and Trout, which in a few years will have been accomplished, will open up parts of the Colony where now not a human habitation is to be found, and will carry civilisation and industry into the desert; so that the only element really wanting in order to bring back prosperity is the ability to create it.

Before concluding, I desire to express my acknowledgments to Dr. Hall for his obliging courtesy in responding to several communications which I made to him on the subject of improving our Vital Statistics; to Mr. Stops, for some Returns of Fees supplied by him, which it did not come within the strict requirements of his duty to furnish; and to Mr. Solly, for some suggestions as to the form of the Returns relating to several of the Penal and Charitable Institutions. The aid afforded by Mr. Hull, in reading with me a part of the proof sheets, has been already mentioned. I also desire to acknowledge the zealous co-operation of Mr. Barnard in all matters relating to the printing of this Volume.

The following words, from the preface to the Essay entitled "The Progress of Victoria," by the Registrar-General, which has been printed in the Report of the Exhibition just closed, are so apposite to the present occasion that I cannot do better than reproduce them here:—"All who have ever attempted to work up statistical data will readily appreciate the great amount of methodised skilled labour necessary to the accurate combination of facts as herein presented. In dealing with the vast mass of figures whence those now furnished were drawn, it is hardly possible to escape some inaccuracy. But it is hoped there exists no error of importance. Should any mistake whatever be discovered, I shall be most thankful to have it pointed out, however trifling that mistake may be. 'Trifles,' said the old master, 'make perfection, and perfection is no trifle.'"

I have the honor to be,
Sir,
Your most obedient Servant,

E. C. NOWELL, *Statistician.*

NUMBER OF HOUSES.

RETURN showing the Number of HOUSES *in* TASMANIA, *by the Census of 31st March,* 1857, *as compared with that of 7th April,* 1861.

YEAR.	*Stone or Brick.*	*Wood.*	TOTAL.	*Finished.*	*Unfinished.*	*Inhabited.*	*Uninhabited.*
1857	6760	8258	15,018	14,395	623	14,273	745
1861	7417	11,176	18,593	18,510	83	17,566	1027
Increase in Number of Houses in 1861	657	2918	3575				

RETURN showing the ESTIMATED POPULATION *of the Colony of* TASMANIA *on 31st December, 1866.*

	Males.	*Females.*	*Children whose Sexes have not been distinguished.*	TOTALS.	TOTAL ESTIMATED POPULATION.
Estimated Population on 31st December, 1865	52,822	43,707	— 1328*	—	95,201
Increase during the year 1866 by Arrivals	3126	1217	426	4769	
Ditto ditto by Births	1432	1373	—	2805	
TOTAL	4558	2590	426	7574	
Decrease during the year 1866 by Departures	2337	1235	507	4079	
Ditto ditto by Deaths	792†	536	—	1328	
TOTAL	3129	1771	507	5407	
Increase	1429	819	—	2248	
Decrease	—	—	— 81*	— 81	
Increase in 1866				2167	
Add Increase					2167
Estimated Population on 31st December, 1866					97,368

* The sign *minus* (—) signifies that the numbers must be subtracted, being the excess of Departures over Arrivals.

† Includes one whose sex was unknown.

E. C. NOWELL, *Statistician.*

RETURN showing the Number of MILITARY *(including Women and Children) in* TASMANIA *on the 31st December,* 1866, *together with the Number of Deaths and Discharges.*

	MALES.	FEMALES.	TOTAL.
Number on 31st December, 1866	334	78	412
Deaths that have occurred during 1866		*Nil.*	
Number of Discharges during 1866	4	—	4

J. DWYER, *Lieut.-Colonel 2–14th Regt. Commg. Troops.*

IMMIGRATION under the BOUNTY SYSTEM *in* 1865 *and* 1866.

[a] For 1865.
[b] Of this sum, £33 was for 1865.
[c] Includes loan of £92 18*s.* 5*d.*
[d] Not known.
[e] Not including Roads in South Longford District.
[f] Assessment on Private Property, 6*d.*; on Crown Lands rented, 3*d.* The 6*d.* rate for 1865 was collected in 1866.
[g] Assessment for 1865 collected in 1866.
[h] Arrears for 1864–5.
[i] No Rate made for 1866.
[k] Of this item £20 were for clerical assistance in 1865.

The above particulars are compiled (with a few exceptions) from Returns furnished by the Chairmen of the several Trusts, corrected in some cases by reference to the Accounts published in the *Gazette*. From Summerleas a "*Nil*" Return was received. There is some uncertainty about the Horton Accounts, which has not yet been cleared up.

The Balances for and against the Trusts are distinguished by the signs + and — respectively.

E. C. NOWELL, *Statistician.*

TOTALS[h]	9732 13 8								

[a] The balances for and against the Boards are denoted by the signs *plus* (+) and *minus* (—) respectively.

[b] The cause of this balance is chiefly owing to the impracticability of getting important works done in the Dromedary until there is a larger sum at the disposal of the Board.

[c] No money received or expended during the year.

[d] Subdivided during the year into Franklin, Port Cygnet, and Port Esperance. The £251 12*s.* 8*d.* in the balance column represents the unexpended balance of amounts voted to the Port Cygnet and Esperance portions of the Franklin District before the subdivision. The expenditure of said sums has been transferred to said Districts in the following proportions; viz.—Port Cygnet, £123 12*s.* 8*d.*; Esperance, £128. The amount apportioned to the Franklin Road before the subdivision was £367 6*s.* 0*d.*

[e] The sum of £168, advanced by the Corporation, was expended on the Margaret-street works during 1866, in anticipation of the amount to be received; but no payment was made by the Government for that year. On the first of February, however, £175 11*s.* 5*d.* was received by the Chairman as the proportion coming to the Launceston Board of Works for 1866. If this sum is taken in the Statistics as paid in that year, it would leave an unexpended balance of £7 11*s.* 5*d.* The works are performed, without cost to the Board, under the supervision of the Town Surveyor.

[f] No action taken.

[g] For 1865 and 1866.

[h] The Returns being incomplete, the other totals cannot be given.

No accounts have been received from Spring Bay, although repeated applications have been made for them.

[Compiled from Returns furnished by the Chairmen of the respective Boards. The amount apportioned was supplied by the Treasury.]

E. C. NOWELL, *Statistician.*

G. F. HUSTON, *Superintendent and Medical Officer.*

VACCINATION.

SUMMARY of the Returns made of PRIVATE VACCINATIONS *in all Tasmania from the 1st of January to the 31st of December*, 1866.

Place.	*Medical Practitioners.*	*Number of Cases operated upon, specifying the Proportions under and over Six Months old.*			*Number of the foregoing seen on the Eighth Day after Vaccination.*	*Number where the Results were in every respect successful.*	*Remarks.*
		Under Six Months old.	*Over Six Months old.*	*Total.*			
Queen's Asylum, New Town	Coverdale, J.	—	27	*27	27	27	Eighty-nine children were admitted during the year upwards of three years old, nearly one-third of whom were unvaccinated. This affords a good index to the proportion unvaccinated in the Island at from 3 to 12 years old.
Hobart Town	Hall, E. Swarbreck	1	—	1	1	1	
		1	27	28	28	28	

* Three of the children in the Queen's Asylum were vaccinated by me on the public vaccination day in Hobart Town, all of whom had most satisfactory results: from these the 27 children were vaccinated. Though most of the private Medical Practitioners in the Island were supplied with Vaccine Lymph by the Public Vaccinators in Hobart Town and Launceston, yet not one of the 58 made any return of the numbers vaccinated by them, as they were requested to do, by circular from the Colonial Secretary, when Public Vaccinators were appointed. It is much to be regretted that the Medical Practitioners should be so disheartened by the apathy of the public and the legislature on this subject.

E. SWARBRECK HALL, *late Superintendent of Vaccinations.*

VACCINATION—*continued.*

SUMMARY of the Returns of PUBLIC VACCINATIONS *in Tasmania from the 1st of January, 1866, to he 31st of January, 1867.*

REGISTRATION DISTRICTS.	PUBLIC VACCINATORS.	AGES.		TOTAL VACCINATED.	RESULTS.						TOTAL POPULATION BY CENSUS, APRIL, 1861.	REGISTERED BIRTHS.		REMARKS.
		At and under Six Months old.	*Above Six Months old.*		*With Four or more perfect Vesicles.*	*With Three perfect Vesicles.*	*With Two perfect Vesicles.*	*With One perfect Vesicle.*	*Did not Return.*	*Unsuccessful.*		*In all* 1865.	*In all* 1866.	
Launceston..	Maddox, George	24	216	240	185	16	3	—	33	3	13,104 Launceston and Selby,	431	423	Supplies of fresh vaccine lymph given to numerous Medical Practitioners.
Hobart Town	Hall, E. Swarbreck	39	240*	279	197	12	5	2	60	3	24,773 Hobart City, Glenorchy, & Queenborough.	835	732	* Of the 240 above Six months old, 24 only were under Twelve months old; 80 were at and above Four years old; the oldest Twenty-seven years old, never before vaccinated. Whole families from 2 to 7 in number, previously unvaccinated, numerous. Most of the Medical Practitioners in the Southern Division of the Island, and several in the northern, supplied with fresh vaccine lymph, from unexceptionable cases during the year, many repeatedly.
		63	456	519	382	28	8	2	93	6		1266	1155	

1155 Children's births were registered in the Registration Districts of Hobart Town and Launceston in 1866. Probably the unregistered born during the year would be 145 more; say total births 1300. From this number 100 may be deducted as having died before they attained the age of Six months, and therefore under the age at which "The Tasmanian Vaccination Act" requires that all Children shall be vaccinated. 1200 Children, therefore, ought to have been vaccinated either by Public Vaccinators, or Private Medical Practitioners, during the year in these two Districts. The public vaccination of Children under Twelve months old only amounted to about 100. The private vaccinations returned of the same age was only one. Nevertheless as nearly all the Private Medical Practitioners were repeatedly supplied with vaccine lymph by the Public Vaccinators, 50 more under Twelve months old may be added, making a total of 151 out of 1155 vaccinated. It is evident therefore that, notwithstanding the facilities afforded by gratuitous public vaccination, and a constant supply of fresh and perfect vaccine lymph, no less than 1004 Children born last year in these two Districts, and living to be old enough to be vaccinated in accordance with "The Vaccination Act," were not vaccinated. There can be no doubt that in the remaining Registration Districts of the Island where no Public Vaccinators were employed, and where Private Medical Practitioners could not possibly maintain a constant succession of vaccinations, but were dependent for supplies of fresh lymph upon the Public Vaccinators of Hobart Town and Launceston, the proportion of unvaccinated children to births must be much greater. These facts indicate that there are many thousands of unvaccinated Children now in Tasmania unprepared to resist the Small-pox contagion whenever it may get a footing in the community, and that the numbers in future will be still more considerable, from the abolition of Public Vaccinators and the transfer of their duties to the Resident Medical Officers of the Hospital.

The present compulsory Vaccination Act of Tasmania being useless, nothing but the passing of an amended Act, such as has been so successful in Ireland and Scotland, can possibly protect the population of Tasmania from the terrific ravages of some sudden invasion of Small-pox. The recent destructive outbreak in Madagascar gives us warning of what may be the result in our unprotected state. No exertions of the Medical Profession, when the disease is once raging amongst us, will avail to prevent the sacrifice of many lives.

E. SWARBRECK HALL, *late Superintendent of Vaccinations.*

‡ Taken from Rolls for 1867.

[Compiled from Returns furnished by the Returning Officers.]

E. C. NOWELL, *Statistician.*

ROYAL SOCIETY.

RETURN of the Receipts and Expenditure of the ROYAL SOCIETY *of Tasmania, and of the Number of Persons who visited the Museum and Gardens respectively, in the Year* 1866.

RECEIPTS.				EXPENDITURE.				Balance to next Year.	Number of Visitors to Museum during the Year.	Number of Visitors to Gardens during the Year.
Balance at the beginning of the Year.	From Government.	From Subscriptions and other sources.	TOTAL.	For Museum.	For Gardens.	Other Expenses.	TOTAL.			
£ s. d.	£ s. d.	£ s. d.	£ s. d.	£ s. d.	£ s. d.	£ s. d.	£ s. d.	£ s. d.		
—24 5 0	462 10 0(a)	365 9 4	827 19 4	238 15 6	671 3 9	163 8 9	1073 8 0	—245 8 8(b)	6869	21,886

(a) For 9 months only, £150 being for Museum, and £412 10*s.* 0*d* for Gardens.

(b) From this has to be deducted the amount of the Government Grant for one quarter due, which, together with other assets, will reduce the balance to debit to about £24.

J. W. AGNEW, *M.D., Hon. Secretary.*

NOTE.—The sign *minus* (—) signifies that the Balances were against the Society.

GOLD MINING.

RETURN relative to GOLD-MINING *Operations at* FINGAL.

NUMBER OF PERSONS EMPLOYED.			Appoximate Value of Mining Plant.	ALLUVIAL DIGGINGS.		QUARTZ MINES.(a)				
In Alluvial Diggings.	In Quartz Mining.	TOTAL.		Gold produced.	Value.	No. of Tons of Quartz crushed.	Amount of Gold produced.	Value.	Average Yield per Ton.	Average Cost of crushing per Ton.
			£				ozs. dwts. gns.	£	dwts. gns.	s. d.
6	30	36(b)	6000	(c)	(c)	2872	347 16 0	1044	2 10	12 6

(a) These particulars relate only to the Fingal Quartz Crushing Company.

(b) There are also 30 Tradesmen not included in this number.

(c) The Council Clerk at Fingal states: "It is impossible to give the quantity and value of Gold obtained from alluvial diggings, although there is reason to believe that those employed thereon are doing well."

[The above information was obtained through the Warden of Fingal.]

E. C. NOWELL, *Statistician.*
